

MARKER SOCKET

While checking torque, it can paint a bolt head at the same time.
This is the solution to double jobs of torque check and marking.

Remarks
Ink is not contained in the cartridge.
Please supply ink by yourself.
The recommendation of ink is listed below.

【 Specification 】

- * The complete set consists of a marker socket, a ink cartridge, a spring and the cartridge cap.
- * The cartridge can be inserted /take off easily, so that ink supply is not troublesome.
- * The paint point is changeable to new one.

The bolt and the nut marked by paint show below.
We can design the sockets based on your applications.

When designing the socket, please advise us the dimensions, a, b, c, d.

Bolt application

Nut application

MARKER SOCKET™

Ink cartridge (Part name : SOCKET MARKER-C)

* When not using the socket,
please put the cap into the cartridge
not to dry the ink.

* When the point wear, please change it
to new one.
(the point : "Mitsubishi PCR-5")

【 How to handle 】

Taking off the bottom cap, and supply ink with the cartridge. After that, recover the cap.

- Supply ink by the injection like spoit.
Please do it slowly.
- Please be careful for oversupply.
2/3 of the tank is enough.
- The recommended inks are shown below.

Put the spring into the socket.
Insert the cartridge, holding a spring projection in (A) the hole.

To take off the cartridge, put the spring projection by any stick.
(Please be careful for the cartridge not to jump out.)

NAC MARKER SOCKET
